Ghaziabad, Utter Pradesh

OBJECTIVE

Data Engineer with 3 years' experience in database development, data pipelines development and maintenance. Have solid background in designing, developing, and optimizing end-to-end data solutions. Proficient in utilizing SQL Server, SSIS, Azure Data Factory, and T-SQL to create efficient ETL processes and orchestrate the data pipelines. Skilled in collaborating with teams to understand business requirements.

EXPERIENCE

• Mishi Technologies

Present

Data Engineer

Noida

- Responsible for developing, support and maintenance for the ETL processes, orchestration using Azure Data Factory (ADF), Azure Sql Server, ADLS, Az Monitor etc.
- Existing SSIS jobs migration in ADF using ADLS, and Az SQL Database.
- Worked on SSIS, T-SQL skills, Stored procedures, triggers, Query optimization and performance issues.
- Worked on ADF parameterization features to manage archiving frequency, data cutoff dates, and destination storage options.
- Employed ADF capabilities to orchestrate the extraction and loading of source data into the destination systems.
- Create Mapping Dataflow to load the incremental data changes SCD type 1 into the warehouse

• RGS IT Solution 2021 -

2023

Developer

Greater Noida

- Analyzed the source system and worked on designing the ETL processes using SSIS.
- Monitoring and Checking logs and load details, resolving issues related to long running failure jobs.
- Expertise in writing T-SQL Queries, sub-queries and joins for generating Stored Procedures, Triggers, User-defined Functions and Views
- Implemented custom scripts and expressions in SSIS for advanced data transformations.

SKILLS

- **Programming Languages:** SQL and T-SQL,
- **Database Systems:** MS SQL Server, MySQL
- **ETL Tools:** Azure Data Factory(ADF), SSIS, MS Fabric, Power BI
- **Cloud Technologies:** Azure Sql database, ADLS Gen2, Azure Function, Azure Logic Apps,

CERTIFICATION

Microsoft Certified: Fabric Analytics Engineer Associate

Microsoft Certified: Fabric Data Engineer Associate
